

Kishwaukee College Syllabus
CIS 250 - 5H01
C++ Programming II - Honors
3 Credit Hours, Spring 2017

A. Course Description

The second course in the C++ language. Abstract data types will be used in the design and implementation of solutions to large-scale problems. Topics include: classes, inheritance, polymorphism, and encapsulation; files and pointers; scope, blocks and dynamic memory; recursion; data structures including stacks, lists, queues, trees; graphs; text processing; and searching and sorting algorithms. Programming assignments will be completed outside of class. IAI CS 912. Three hours lecture/discussion a week.

Prerequisite: CIS 150.

B. Meeting Time and Place

Lecture/Lab:	A-1374	
Time:	12:30 P.M. - 1:45 P.M.	Monday, Wednesday
Dates:	1/18/17 - 5/19/17	
Withdrawal date:	5/1/17	
MLK Birthday observed:	1/16/17	School closed
Faculty development:	4/13/17	School closed
Good Friday:	4/14/17	School closed
Spring break:	3/13/17 - 3/19/17	School closed
Midterm exam:	3/8/17	during class
Final exam:	5/15/17	Noon - 1:50 P.M.

C. Instructor Information

Instructor:	David G. Klick
Office:	A-1342
Email:	David.Klick@kishwaukeecollege.edu
Phone:	815-825-9337
Website:	kermit.kishwaukeecollege.edu/~dklick/
Backup website:	klickfamily.com/david/school/
Desire2Learn:	https://kish.desire2learn.com/
Dept. Secretary:	815-825-9303 (Shelley Lawson)
Office hours:	M 1:45 P.M. - 2:30 P.M., 5:00 P.M. - 6:00 P.M. T 1:45 P.M. - 2:30 P.M., 5:00 P.M. - 6:00 P.M. W 10:00 A.M. - 11:00 A.M. R 10:45 A.M. - 12:30 P.M. other times by appointment

D. Expected Learner Outcomes

Upon completion of this course, the student will be able to:

1. generate reports and process text
2. use sequential and random access files to save and retrieve data
3. create, use and destroy objects

4. control access to object member data and member functions
5. overload and override methods
6. overload operators
7. create new classes derived from existing classes
8. declare and use virtual functions
9. implement a number of data types including lists, stacks, queues, and trees
10. discuss graphs
11. discuss algorithm complexity
12. create and manage programs with multiple source files

E. Required Text and Materials

1. Malik, D. (2013). *C++ Programming: Program Design Including Data Structures, 6th edition*. Boston, Massachusetts: Course Technology. [ISBN-10: 1-1335-2632-2, ISBN-13: 978-1133526322]
4th, 5th, and 7th editions acceptable also
2. Internet access

F. Breakdown of Course Requirements

10 programs @ 50 points each	500 points
1 honors programming project @ 200 points	200 points
1 midterm exam @ 100 points	100 points
1 final exam @ 100 points	100 points
<hr/>	
Total	900 points

G. Final Grade Determination

A = 90 - 100%	810 points or more
B = 80 - 89.9%	720 - 809 points
C = 70 - 79.9%	630 - 719 points
D = 60 - 69.9%	540 - 629 points
F = below 60%	less than 540 points

Grade reports will not be mailed out. Please check KishSOS, My Student Info, under Academic Profile, Grades, for grade reports.

H. Course Procedures

1. Students are expected to attend class sessions on time and prepared (Note: CIS 123 class sessions are optional attendance). Students should bring whatever they need to take notes to every class.
2. Students are expected to spend **time outside of class** completing assignments.
3. Food and beverages are not permitted in the classrooms or labs. See a more detailed policy at <http://kermit.kishwaukeecollege.edu/~dklick/foodDrinkPolicy.html>
4. A familiarity with computers and the Windows operating system is expected.
5. Depending on the assignment, both digital and hardcopy versions of assignments may be required for submission. The procedure for submitting digital copies of assignments will be explained in class. Make sure you always keep a copy of all of your assignments. The instructor is NOT responsible for network failures, server failures, or student mistakes.
6. The instructor answers many questions via email. Due to the high volume of requests, submissions, and questions received via email, the instructor must prioritize responses. Most questions will be answered (or at least acknowledged) within 48 hours. If you do not get a response when you expect one, please keep in mind that your email may have failed to reach the

instructor, or may have automatically been rejected by an email client or server. Please try to contact the instructor again and possibly use the phone or an in-person visit if email is failing.

I. Make-up Policy

1. Assignments are to be turned in on time. Assignments which are not turned in on time will not be accepted unless individual arrangements are made **in advance** with the instructor. In unusual cases where late assignments are accepted, the cost of being late is ten percent of the total possible points for every portion of a day late, up to a maximum of three days late. For example, an assignment received twenty-five hours past its due date will lose twenty percent of its total possible point value (because it is two days late). Assignments which are received more than three days (seventy-two hours) late will not be accepted and are not worth any points. Exceptions may be made to this rule if the student contacts the instructor before the due date and makes special arrangements **in advance** with the instructor. All late acceptance decisions of this nature are left solely to the discretion of the instructor. This rule does not apply once answers to an assignment have been distributed or posted. Assignments submitted after answers have been released are worth zero points even if the answers are posted one minute past the due date.
2. Answers to assignments may be posted online, handed out in class, or sent via email by the instructor. Once an answer to an assignment has been released, no further submissions for the assignment will be allowed. This rule supersedes all other rules about when late assignments may be accepted. In general, the instructor will try to wait at least forty-eight hours before posting or distributing solutions, but there is no guarantee, so get your assignments in on time.
3. Tests are to be taken at the day and time scheduled. Failure to take a test at the scheduled time may result in a grade of 0 for that test. In the case of an excusable absence or a genuine emergency, the instructor must be contacted as soon as possible, preferably before the scheduled test, to reschedule the makeup of that test in the Learning Skills Center on the day the student returns to campus.

J. Attendance Policy

Class attendance is strongly encouraged. You are responsible for whatever was covered in class, whether you are there or not. If you must miss a class, it is your responsibility to contact the instructor and make arrangements for notes, handouts, or announcements that were missed. Although attendance is not counted toward the final grade, there may be coursework which is done during class time which may count toward the final grade and may not be able to be taken outside of class time.

Tentative Weekly Schedule

Please note that this schedule and the topics covered are likely to change. Changes will be announced in class. If you are not able to attend class, it is your responsibility to find out what was covered. A more detailed schedule is provided on the course website. Assignment descriptions and due dates will also be posted on the course web site.

Week	Date	Topics	Reading
1	1/16, 1/18	I/O and formatting <ul style="list-style-type: none">• School closed on 1/16/17 for MLK observance• review syllabus• compiling and running programs on the remote server• assignment submission	Syllabus Chapter 3

		<ul style="list-style-type: none"> • using cin, get, and ignore • using peek and putback • detecting input stream failure and using the clear function • formatting output: setprecision, fixed, showpoint, setw, setfill, left, right • additional formatting manipulators: dec, hex, oct, showbase, boolalpha, etc. • I/O using string objects • debugging using cout statements • text file input and output 	
2	1/23, 1/25	<p>User-defined functions</p> <ul style="list-style-type: none"> • function prototypes • void vs. value returning functions • formal parameter lists • parameters vs. arguments • default values for parameters • function overloading • passing by value, passing by reference, and reference variables • "returning" more than one value from a function • variable/identifier scope (global, local) • variable lifetime (static, automatic) • how/where variables are stored in memory: stack vs. heap • testing functions • a brief introduction to recursion 	Chapter 6
3	1/30, 2/1	<p>User-defined simple types, namespaces, string objects</p> <ul style="list-style-type: none"> • declaring enumerations • declaring variables with an enumeration data type • using enumerations (operators, I/O, passing to/from functions) • the importance of using enumerations • creating and using namespaces (example: kishio I/O library) • declaring and using C++ string objects 	Chapter 7
4	2/6, 2/8	<p>Arrays and C-style strings</p> <ul style="list-style-type: none"> • declaring one-dimension arrays • accessing a member of a one-dimension array • initializing a one-dimension array during declaration • passing one-dimension arrays to functions (passed by reference) • using a loop to iterate through the elements of a one-dimension array • common errors trying to access non-existent array 	Chapter 8

		<p>elements</p> <ul style="list-style-type: none"> • using an array name as a pointer to the first element • using the const keyword to prevent changes to a passed array • declaring and using C-style strings (arrays of type char) • comparing C-style strings • performing I/O with C-style strings • declaring and using parallel arrays • declaring two-dimension arrays • accessing a member of a two-dimension array • initializing a two-dimension array during declaration • passing two-dimension arrays to functions (passed by reference) • using nested loops to iterate through the elements of a two-dimension array • arrays of objects (such as C++ string objects) • extending array concepts beyond two dimensions 	
5	2/13, 2/15	<p>Structs and classes</p> <ul style="list-style-type: none"> • defining a struct or class • declaring variables with a struct or class data type • accessing members of a struct or class • specifying public and private access • the differences between a struct and a class • passing structs and classes to and from functions • creating an array of a struct or class type • using assignment with a struct or class • built-in operations • struct/class scope • accessor and mutator functions • constructors • default constructor • destructors • static class members (including initialization of static variables) • the importance of information hiding • UML diagrams of classes 	Chapters 9, 10
6	2/20, 2/22	<p>Inheritance and composition</p> <ul style="list-style-type: none"> • overriding member functions • constructors of derived and base classes • destructors in a derived class • header files and header guards • protected class members • public vs. private vs. protected • composition 	Chapter 11

7	2/27, 3/1	<p>Exception handling</p> <ul style="list-style-type: none"> • throwing an exception • using try/catch blocks • rethrowing an exception • creating your own exception class • exception handling techniques • using assertions • exceptions vs. assertions • error handling techniques (terminate, fix and continue, log and continue) 	Chapter 14
8	3/6, 3/8	<p>Pointers, classes, virtual functions, lists, midterm exam</p> <ul style="list-style-type: none"> • declaring and initializing pointer variables • the address-of operator (&) • the dereferencing operator (*) • dynamic memory; using new and delete • operations on pointer variables • creating and using dynamic arrays • shallow vs. deep copies • functions that objects with dynamic memory should implement/override • functions that need special care when using pointers (constructor, copy constructor, assignment operator, destructor) • inheritance, pointers, and virtual functions • abstract classes and pure virtual functions • demonstrate polymorphism • array-based lists • unordered lists • ordered lists • midterm exam 	Chapter 12
	3/13-3/19	School closed for Spring break	
9	3/20, 3/22	<p>Overloading and templates</p> <ul style="list-style-type: none"> • the reasons for operator overloading • restrictions on operator overloading • overloading binary operators • overloading unary operators • overloading binary operators • member vs. non-member syntax for overloading funtions • friend functions • overloading the stream insertion operator (<<) • overloading the stream extraction operator (>>) • specifying post-increment and post-decrement operator overloads • overloading the assignment operator 	Chapter 13

		<ul style="list-style-type: none"> • overloading the array index operator ([]) • function templates • class templates 	
10	3/27, 3/29	<p>Recursion</p> <ul style="list-style-type: none"> • definition of recursion • direct and indirect recursion • avoiding infinite recursion • recursion vs. iteration • when to use (or not use) recursion 	Chapter 15
11	4/3, 4/5	<p>Linked lists</p> <ul style="list-style-type: none"> • header and implementation files (revisited) • structure of a linked list and its nodes • basic implementation of a linked list • implementing a copy constructor, assignment operator, and destructor • operations on a linked list (insertion, deletion, access elements, display, etc.) • basic introduction to algorithm complexity analysis: linked list operations • templating a linked list • linked list iterators • linked list variation: doubly linked list • linked list variation: unordered list base class • linked list variation: ordered list derived class 	Chapter 16
12	4/10, 4/12	<p>Stacks, queues</p> <ul style="list-style-type: none"> • structure of a stack (LIFO) • basic implementation of a stack • implementing a copy constructor, assignment operator, and destructor • operations on a stack (push, pop, peek/top, isEmpty/empty) • templating a stack • implementing a stack using a linked list • implementing a stack using an array • stack applications • structure of a queue (FIFO) • basic implementation of a queue • implementing a copy constructor, assignment operator, and destructor • operations on a queue (add, remove, isEmpty/empty) • templating a queue • implementing a queue using a linked list • implementing a queue using an array 	Chapter 17

		<ul style="list-style-type: none"> • queue applications • queue variation: ring buffer • queue variation: double ended queue (deque) 	
13	4/17, 4/19	<p>Searching and sorting</p> <ul style="list-style-type: none"> • sequential search • binary search • restrictions on binary search (data must be in sorted order) • algorithm complexity analysis of linear and binary search • basic sorting algorithm implementation: insertion sort • basic sorting algorithm implementation: selection sort • basic sorting algorithm implementation: bubble sort • advanced sorting algorithm walk-through: quick sort • advanced sorting algorithm walk-through: merge sort • introduction to binary tree structure and properties • binary tree variation: the heap data structure • minheaps vs. maxheaps • implementing a heap using an array • advanced sorting algorithm walk-through: heap sort • advanced sorting algorithm walk-through: bogosort/Robsort • algorithm complexity analysis of sorting algorithms • sorting arrays vs. linked lists 	Chapter 18
14	4/24, 4/26	<p>Binary trees</p> <ul style="list-style-type: none"> • properties of a binary tree (revisted) • properties of a binary search tree (BST) • implementation of a binary search tree • operations on a binary search tree: insert, delete, search, traverse, isEmpty • avoiding degenerate binary search trees when inserting sorted data: balanced BSTs • BST traversal: inorder, preorder, postorder • finding a BST's minimum and maximum values • finding the successor or predecessor of a node in a BST • various ways of handling duplicate values in a BST • using recursion vs. iteration when traversing a BST • algorithm complexity analysis for BST operations • BST applications 	Chapter 19
15	5/1, 5/3	<p>Graphs</p> <ul style="list-style-type: none"> • graph terminology: vertex, edge, neighbor, weighted, directed, acyclic, connected, etc. • graph data structures: vertex list, edge list, adjacency list, adjacency matrix 	Chapter 20

		<ul style="list-style-type: none"> • adding a vertex • adding an edge • breadth-first traversal • depth-first traversal • determining if a path exists • determining if a graph is connected • finding a minimum spanning tree • finding a shortest path • graph applications 	
16	5/8, 5/10	Binary files and random access files <ul style="list-style-type: none"> • writing binary data • reading binary data • writing to a random access file • reading from a random access file • advantages and disadvantages of binary files • advantages and disadvantages of random access files 	Appendix E
Finals	5/15/17	Final exam: Noon - 1:50 P.M., Rm. A-1374

|---|---|

Please see the Kishwaukee College Catalog for other policies and resources

A. Academic Dishonesty

In order to evaluate student work, faculty must be able to trust that the work is original with a student and not the work of someone else. Cheating, falsifying information, forgery, plagiarism, and other dishonest actions will not be tolerated. Detailed information can be found by clicking on this link: www.kishwaukeecollege.edu/student-life-essential-student-information/student-code-conduct

B. Assistive Resources Center/Disability Services

Any student with a documented disability or special learning need and wanting to request accommodations, should contact the Assistive Resources Center in A1317 or at (815) 825-2086 ext. 4290, (815) 825-9106 (TTY). More information can be found on the MyKC Portal: <https://mykc.kishwaukeecollege.edu/collegeareas/vpss/disabilityservices/Pages/default.aspx>

C. Attendance Verification Roster

Students who do not attend their class during the refund period will be dropped from the class roster

and will be charged for the class. More information can be found on the MyKC Portal: <https://mykc.kishwaukeecollege.edu/collegeareas/vpfa/bo/Pages/default.aspx>

D. Class Cancellations

Class cancellations due to inclement weather will be posted on the College Website: www.kishwaukeecollege.edu or announced by the local radio stations. You may sign up for text alerts at myKC/Student Resources/Text Alert. Students may also call the College at (815) 825-2086. Class cancellations due to instructor absence will be posted on the classroom door. Room changes will be announced in advance whenever possible and posted on the classroom door.

E. Class Withdrawal

A "W" cannot be given as a final grade. The student is responsible for officially withdrawing from the class according to procedures described in the college catalog. Refer to page 166. Kishwaukee College reserves the right to administratively withdraw students from the Attendance Verification Roster or the Midterm Roster those students who are not actively pursuing course objectives or who are in violation of standards of behavior as outlined in the Student Code of Conduct and Discipline. For a copy of the student conduct policy, contact the Vice President of Student Services Office or refer to the Kishwaukee College catalog.

F. Community Resources

There are numerous community resources that are available to assist students in addressing a variety of personal needs. Resource contact information can be found on MyKC: <https://mykc.kishwaukeecollege.edu/collegeareas/vpss/counseling/Pages/Documents.aspx>

G. Copyright

As a Kishwaukee College Student, you may have copyrighted materials or software made available to you by the college for course use. Please understand that copyright law may prohibit copying or further distribution of these materials. Full information can be found here: www.kishwaukeecollege.edu/student-life-essential-student-information-students-right-know/copyright-law-notification

H. Emergency Procedures/Safety

Yellow and red Emergency Information flipcharts are located in each classroom. These are quick reference sheets with telephone numbers to reach emergency assistance and a brief description of the correct actions to take in the event of a tornado, fire or other emergency on campus. More information can be found in the college catalog on page 196.

I. Graduation Requirements for Transfer Degree Students

Guidelines and specific requirements can be found here: www.kishwaukeecollege.edu/academics-resources/graduation-requirements

J. Incomplete Grade

All course requirements must be completed by the end date for the course. In the event that extremely difficult circumstances merit granting a student more time to finish course requirements, an "Incomplete" (I) grade may be given. More information can be found in the college catalog on page 170.

K. Learning Skills Center (A1300)

Tutoring, The Writing Center, make-up tests, online tests, and placement tests are available through the Learning Skills Center. For more information, go to <https://mykc.kishwaukeecollege.edu/collegeareas>

L. Recordings of Classes/Presentations

Kishwaukee College prohibits students from electronically recording class lectures and presentations (either by audio, video, picture, or otherwise) unless certain qualifying conditions are met.

1. The student requires the recording of lectures/presentations as part of his/her accommodations related to a disability that has been adequately documented with the Coordinator of the Assistive Resources Center.
2. The instructor has given advance written permission to the student that stipulates what may be recorded and by which device(s) the lectures/presentations may be recorded.

In either of the above cases, the following restrictions shall apply:

1. Recordings are solely for the use of the student designated either in the disability accommodations or the instructor's written permission to record.
2. Recordings must not be shared or reproduced for any reason.
3. Recordings must not be posted on any public or private website or social media service.
4. Recordings must be destroyed by the student at the end of the semester in which the recording was made.

A student found to have committed a violation of this procedure shall be subject to one or more sanctions described in the Code of Student Conduct and Discipline. Students seeking to obtain permission to record a class must inquire with the instructor in question and, if the instructor agrees to allow recording, the student and instructor must complete a Permission to Record a Class/Lecture Presentation form.

M. Religious Observances

Students faced with schedule conflicts related to a religious observance should make prior arrangements with the instructor a minimum of seven (7) school days in advance of the examination or other activity involved.

N. Student E-Mail

Your Kishwaukee College e-mail account will be the official way to receive notices from the College. If you choose to forward your e-mail to another account, please be advised that all communication from and within the college will use your Kishwaukee student e-mail. When communicating with instructors or employees of the college, you are required to use your Kishwaukee e-mail address.

O. Technical Support

If you require technical support, please contact the Help Desk:

1. helpdesk@kishwaukeecollege.edu
2. (815) 825 2086, ext. 4357 (HELP)
3. Visit the Helpdesk's office located in Media Services A1252
4. <http://helpdesk.kishwaukeecollege.edu>
